Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1-7 are allowable over the prior art of record because the prior art of record does not teach or suggest the entire combination of elements of the leader block rotary mechanism set forth including a rotator cam, having an over-rotation limiting device, the rotator cam is constantly energized to rotate in the direction where the leader pin is released from the hook part so as to give torque to the rotator lever in the release direction; and the over-rotation limiting device transmits the torque of the rotator cam in the capture direction to the rotator lever and also allows rotation of the rotator cam while keeping the rotator lever, the leader block picker and the leader block at the rotation end position. None of the references of the prior art teach or suggest the combination of the leader block rotary mechanism as advanced above and such do not provide the necessary motivation, absent applicant's specification, for modifying the leader block mechanism in the manner required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
